Portfolio | LeetCode | GeeksforGeeks

Professional Summary

Full-Stack Engineer with approx. 3 years of experience building scalable web applications and integrating AI/LLM tools using React.js, Next.js, Vue.js, Node.js, and Python. Experienced in REST APIs, authentication, payments, and database-driven features, with a record of debugging production issues on live fintech and e-learning platforms.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Vue.js, Redux Toolkit, RTK Query, Tailwind CSS
Next.js: App Router, React Server Components, Server Actions, SSR, SSG, ISR
Backend: Node.js, Express.js, Django, REST APIs, WebSockets, Webhooks, Cron Jobs
AI / LLM: OpenAI API, Groq API, Vercel AI SDK, Prompt Engineering, RAG, Embeddings
Databases: MySQL, MongoDB
Security: NextAuth.js, JWT Authentication, Role-Based Access Control, CSRF Protection
Integrations: Payment Gateways (Razorpay, PayU, PhonePe), WebRTC, SMS / OTP Gateways
Tools: Git, GitHub, Postman, Vite
Core Concepts: Data Structures and Algorithms, MVC Architecture, API and Query Optimization, Performance Optimization (Code Splitting, Lazy Loading, Caching)
Familiar With: Redis, Docker, Jest, React Testing Library, CI/CD, Jenkins, MUI, FastAPI

Experience

Definedge Solution Pvt. Ltd. Feb 2025 – Present
Software Engineer *Pune, India | On-Site*

- Built and maintained full-stack features for live fintech and e-learning platforms using React.js, Next.js, Vue.js, Node.js, Express.js, and MongoDB.
- Developed reusable, responsive UI components with React.js, Next.js, Redux Toolkit, and Tailwind CSS, improving UI consistency and development speed by 30%.
- Improved page load performance by 40% through code splitting, lazy loading, and API response caching.
- Designed and optimized REST APIs with Node.js and Express.js, reducing response times by 40% through database query optimization.
- Troubleshot and resolved critical production issues, collaborating with cross-functional teams to deliver features from requirements to release.

Independent Consultant Jan 2023 – Jan 2025
Full-Stack Engineer (Freelance) *Remote*

- Managed the backend and frontend (Admin Panel) of the FortuneTalk application, ensuring robust and efficient server-side operations.
- Developed and maintained RESTful APIs using Node.js, Express.js, and MongoDB to support frontend functionalities.
- Implemented new features and enhanced existing ones, improving user engagement and satisfaction by 30%.
- Collaborated with frontend developers to integrate user-facing elements with server-side logic using React.js, Redux, Webpack, and Material-UI.
- Optimized database queries and maintained data integrity with MongoDB, improving data retrieval speed by 15%.
- Used Git for version control and managed code repositories.

V2web Hosting Pvt. Ltd. May 2022 – Jan 2023
Backend Developer *Noida, India | On-Site*

- Maintained and enhanced web applications using PHP, Node.js, Express.js, MongoDB, and MySQL.
- Fixed critical bugs and refactored existing code, improving code efficiency by 30%.
- Mitigated bot-driven spam and fraudulent activity by 20% through targeted backend fixes and anti-abuse measures.
- Integrated Google reCAPTCHA to strengthen website security, decreasing bot-generated traffic by 25%.

Projects

Gurukul [gurukul.definedgesecurities.com] [Live Demo]
Next.js, React.js, TypeScript, Node.js, Express.js, MySQL, Redux Toolkit

- Developed a full-stack e-learning platform supporting course discovery, enrollment, online learning, books, videos, events, user dashboards, and secure content access.
- Built responsive and reusable interfaces using **Next.js**, **React.js**, **TypeScript**, and **Tailwind CSS** for course listings, learning modules, dashboards, cart, and account management.
- Implemented **Server-Side Rendering (SSR)** and **Static Site Generation (SSG)** with Next.js to improve page performance, SEO, and content discoverability.
- Implemented **SEO** best practices including dynamic metadata, semantic HTML, optimized page structure, and search-engine-friendly course and content pages.
- Developed **RESTful APIs** using **Node.js** and **Express.js** for authentication, course management, cart and order processing, payments, certificates, and role-based access control.
- Integrated **MySQL** for managing users, courses, orders, certificates, and learning content, with optimized queries and efficient database operations.
- Implemented payment workflows, webhooks, course access validation, and **cron jobs** for automated course expiry and access management.
- Used **Redux Toolkit** and **RTK Query** for centralized state management, API caching, data synchronization, and frontend performance optimization.

Momentify [momentify.definedgesecurities.com] [Live Demo]
Vue.js, JavaScript, Tailwind CSS

- Developed a responsive frontend application using **Vue.js**, **JavaScript**, and **Tailwind CSS** with reusable components and responsive layouts.
- Implemented modular **Vue.js** components and state management to support scalable feature development and maintainable application architecture.
- Integrated **REST APIs** for dynamic data retrieval and implemented search, filtering, and personalized content functionality.
- Optimized frontend performance through efficient component rendering, lifecycle management, API handling, and reusable component architecture.

Algo Trader [algostra.definedgesecurities.com] [Live Demo]
Vue.js, JavaScript, Tailwind CSS

- Developed a responsive trading interface using **Vue.js**, **JavaScript**, and **Tailwind CSS** for presenting market data, trading signals, and portfolio information.
- Built interactive dashboards and reusable components to display real-time market data and trading-related insights.
- Integrated **RESTful APIs** for retrieving market data and supporting order execution and portfolio management workflows.

AI-Powered Resume Builder [Live Demo] [GitHub]
FastAPI, Python, React, TypeScript, Tailwind CSS, Redux Toolkit, MongoDB, Groq API, OpenAI API

- Architected a **FastAPI** backend integrating **Groq/OpenAI LLMs** for resume tailoring, summary generation, and cover letter creation based on target job descriptions.
- Engineered a "Fact Guard" system that intercepts LLM responses and rejects hallucinated metrics or experiences not present in the user's data.
- Built an AI analysis pipeline that scores resumes for ATS compatibility, identifies skill gaps, gives actionable feedback, and generates interview questions.
- Implemented document parsing with **PyMuPDF** and **python-docx** to extract text from multi-column PDF and DOCX uploads, and export engines (Jinja2, xhtml2pdf, python-docx) for ATS-compliant PDF and DOCX output.
- Designed a privacy-first data flow with **MongoDB** (Motor), keeping parsed resumes in memory and persisting only user-initiated versions.
- Developed the frontend with **React 19**, **TypeScript**, Vite, Tailwind CSS, Redux Toolkit, and Radix UI, with AI agents interacting only with a centralized JSON schema while templates handle layout.

Chat AI [Live Demo] [GitHub]
React, TypeScript, Vite, Tailwind CSS, Redux Toolkit, FastAPI, Python, MongoDB, OpenAI API, Groq API

- Built a ChatGPT-style web app with a **React**, **TypeScript**, and **Redux Toolkit** frontend and a **FastAPI** backend, streaming LLM responses in real time over **Server-Sent Events (SSE)**.
- Designed a provider abstraction layer that switches between OpenAI (GPT-4o), Groq (LLaMA 3), and a mock provider for local testing.
- Implemented chat management (create, rename, delete, switch conversations) with **MongoDB** persistence, plus **RTK Query** for data fetching, optimistic updates, and message retries.
- Developed a responsive UI with Tailwind CSS and Radix UI, Markdown rendering with syntax highlighting, and FastAPI middleware for request timing, request IDs, and CORS.

FortuneTalk Application [FortuneTalk] [Astro FortuneTalk]
HTML, CSS3, JavaScript, React.js, Material UI, Node.js, Express.js, Webpack, MongoDB, Redux

- Engineered robust **REST APIs** (GET, POST, PATCH, PUT, DELETE) for the backend, enabling seamless data transactions and increasing data retrieval efficiency by 50%, significantly reducing user wait times.
- Added features such as Call, Chat, Video Call, Free Insights, E-commerce, and Learning Section to enhance user engagement and functionality.
- Integrated third-party APIs including SMS Gateway (OTP), astrology API (Free Insights), call (Knowlarity), Video Call (Zegocloud), and **Razorpay** (Payment gateway) to extend application capabilities.

Education

Dr. D. Y. Patil Vidyapeeth (Centre for Online Learning) 2026 – Present
Master of Computer Application (MCA) | SGPA: 9.6 (Sem-I) *Pune, Maharashtra*

Bhupendra Narayan Mandal University 2017 – 2020
Bachelor of Computer Applications (BCA) | Percentage: 76.6% *Purnea, Bihar*

Achievements

Coding Profiles: Solved 300+ problems on LeetCode, 200+ problems on GeeksforGeeks.
